This challenge requires each tribe to build the tallest possible tower in 30 minutes.

Each tribe will be given 1 newspaper and 5 strips of sticky tape each 15 cm long.

However tribes can purchase more newspaper and sticky tape at a small cost if they believe this will help them build a taller tower than the other tribes.

1 piece of newspaper = 5 points
1 strip of sticky tape (10cm) = 2 points

Each tribe will be allocated 50 points to start with and the following points will be awarded at the end of the challenge:

40 points - tallest tower
30 points - second tallest tower
20 points - third tallest tower
10 points - fourth tallest tower

Good Luck Survivors!
